Lab 0

1. Sign up for Cloud9

We will have you do your assignments on Cloud9, signing up is free. Please follow these directions:

1. Create a free Cloud9 account at http://c9.io, use your full name as your new username (do not use spaces or puncuation).

2. Create a new "workspace" with these options:

   - Workspace name: cse201
   - Workspace type: Hosted workspace, Public
   - Template: C++

3. Open the new workspace you created

4. Click "Share" in the top right corner.

5. Under the "Invite People" box, invite markswoope with "RW" access.

6. Invite csusbdt with "RW" access.

At the end of each week, we will automatically check your Cloud9 account and grade your work.

2. Take codecademy's interactive CLI tutorial

This will be the only week where you have to complete an online, interactive tutorial:

1. Create a free codecademy account at https://www.codecademy.com. Use your full name as your username (do not use spaces or punctuation).

2. Go to your account settings

3. Set "Who can view my profile" option to "Everyone"

4. Complete the command-line tutorial at: https://www.codecademy.com/learn/learn-the-command-line

At the end of this week only, we will check your codecademy profile to see if you've completed the CLI tutorial.
